ORIGINAL

Dear Commissioners:

As someone who cares about my community, I appreciate any opportunities to participate in improving our city, state, country, or the world when possible. Arizona Public Service has been a great partner in that regard within the community. Our schools have resources including solar panels, our non-profits have received millions of dollars, and who can forget how they came to help in the tragedy of the Prescott Firefighters.

This is an Arizona company, they aren't rolling up their banner and moving on to the next state with a chance to make a profit. They have been here for generations and will be in the future. If there are 3,000 people in this state who say "yes" to the idea of leasing their rooftops to produce solar energy, then I say the Corporation Commission should say yes to APS.

Respectfully,

Cheryl Chase, Supervisor Dist 2. Pinal County
